COUGAR UIX™ SYSTEM
The ultimate gaming device management software

Its intuitive user interface and rich feature set will allow you to seamlessly configure your devices and get the most of them, as well as synchronizing them and allowing the user to benefit from their synergies and enjoy a better gaming experience.

COUGAR FUSION™
COUGAR FUSION™ devices can interact to keep themselves synchronized, take profit from synergies and optimize your performance.

600M

Features

8200 DPI HIGH PRECISION SENSOR
The ADNS-9800 high performance laser sensor provides pinpoint cursor control.

32-BIT ARM PROCESSOR
Superior computing speed.

45 DEGREE SNIPER BUTTON (PROGRAMMABLE)
Provides quick access to a more precise aiming mode during gameplay, with a 45º angle design that prevents it from hindering the user's accuracy while pressed.

8 PROGRAMMABLE BUTTONS
8 fully configurable buttons: functions, macros, shortcuts, etc.

COUGAR UIX™ SYSTEM
An integrated gaming device management software that allows the user to get the most of his devices and keep them synchronized

COUGAR FUSION™
COUGAR FUSION™ devices can interact to keep themselves synchronized, take profit from synergies and optimize your performance.

1000HZ POLLING RATE / 1MS RESPONSE TIME
125Hz - 1000Hz USB rate fine-tuning.

512KB ON-BOARD MEMORY
Storage for up to 3 profiles on the mouse. Allows the user to bring his full configuration to another PC without further configuration.

ON-THE-FLY DPI ADJUSTMENT
Allows the user to quickly switch between different DPI settings on the go.

4-STAGE DPI LED DISPLAY
A LED indicator tells the user which DPI mode he is currently using.

MULTI-COLOR PROFILE BACKLIT SYSTEM
Choose 1 out of 16.8 million colors and set a unique color to each profile.

OMRON MICRO SWITCHES
5 million clicks guaranteed.

GAMING-GRADE SCROLL WHELL
The ALPS encoder and the rubberized scroll wheel provide an extremely accurate tactile feedback.

GAMING-GRADE MOUSE FEET
The high quality mouse feet provide a smooth yet accurate experience.

BRAIDED CABLE & GOLDEN-PLATED USB PLUG
Sturdy and durable solutions for gaming

COUGAR UIX™ SYSTEM

The ultimate gaming device management software
Its intuitive user interface and rich feature set will allow you to seamlessly configure your devices and get the most of them, as well as synchronizing them and allowing the user to benefit from their synergies and enjoy a better gaming experience.

COUGAR FUSION™

Devices can interact to keep themselves synchronized, take profit from synergies and optimize your performance.

MR KEY SHARING

You can use the dedicated MR key on the keyboard to start recording a macro on the mouse, without needing to open any software.

MODE SYNC

You can simultaneously switch keyboard and mouse modes using the dedicated mode switch keys on the keyboard, keeping them synchronized.

2WAY-INSTANT MODE SWITCH

Holding down the instant mode switch button of the mouse both mouse and keyboard will switch to the mode assigned to that button for as long as it is kept pressed.
This is useful, for example, to temporarily switch to a mode loaded with defensive/healing skills while playing a MMORPG, only to go back to the standard, more offensive mode when you release the button.
