**INTRODUCTION**  
 COUGAR 500K is a premium gaming keyboard aimed at serious and professional gamers.

Inspired by military "stealth technology", the design is created from elements of geometric facet.  
 Intuitive key and button groupings are neatly integrated into the plastic frame. Thoughtful drawing and diving attention towards key areas and allowing the gamers to concentrate and focus on their competitive matches.

An extra FPS palm rest with magnetic attachment on the palm rest area provides great ergonomic support for WASD keys control.

**REAR**

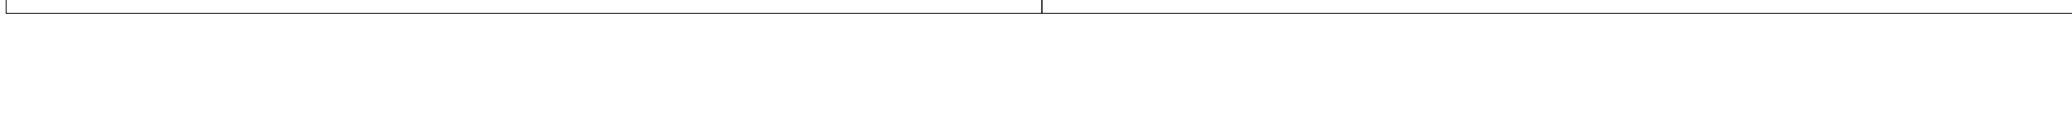

- USB port
- Rubber stands

**DEFAULT BUTTON ASSIGNMENT FRONT**

|              |                  |                   |               |
|--------------|------------------|-------------------|---------------|
| MR key       | Mode switch keys | Repeat rate level | Backlight key |
| Win-lock key | Multi-media keys | G1-G5 keys        | G6 thumb key  |
| FN key       | Palm rest        | FPS palm rest     | 6K / NK keys  |

**PALM REST INSTALLATION PALM REST**

- Place the keyboard on a flat surface.
- Put the palm rest in the correct position underneath the keyboard and push up, until the plastic hinges lock into place.
- Then widening just pull out one side of the hinges, and then pull the other side.
